

Kuapa Dwaso Admin Voiceover Script

Timed to sync with screen recordings of the Admin Control Center

Part 1: Sign-In & MFA

Video Source: *authentication flow* | Duration: 49s

Time Cue: 00:00 - 00:15

Visual: Desktop opens browser showing 'KuapaDweso Admin' sign-in page with slogan 'Control the market. Verify the harvest.' User clicks 'Continue with Google' and selects the account for Kevin Nchorbuno.

Voiceover: "Accessing the platform's control center begins at the Admin sign-in portal. Authentication is managed through Firebase, allowing administrators to sign in securely using Google Identity Services."

Time Cue: 00:16 - 00:45

Visual: Page requests MFA code. User types in code 051230 to verify identity.

Voiceover: "To protect critical agricultural data and operations, we enforce Multi-Factor Authentication. We input our secure one-time verification code to satisfy the two-factor authentication challenge."

Time Cue: 00:46 - 00:49

Visual: Access is granted to the Admin Control Center. Clicks green 'Enter Dashboard' button.

Voiceover: "With verification successful, the Firebase ID token is authenticated against the API service, resolving our active admin profile and loading the control center."

Part 2: Operations Dashboard & Inventory

Video Source: *overview stats & lot Oversight* | Duration: 29s

Time Cue: 00:50 - 00:56

Visual: Operations Overview dashboard loads. Displays total warehouses (7), active inventory (950 bags), disputes (0), and recent logs (59).

Voiceover: "The main operations overview dashboard aggregates live statistics from across our warehouses. In real-time, the system displays our active depots, current grain stock volumes, unresolved disputes, and system logs."

Time Cue: 00:57 - 01:11

Visual: Clicks 'Inventory' tab. Table 'Inventory Lot Oversight' loads. Clicks first item (Receipt WH-WHTKW001-002004 for Osei Andrews) to show right drawer and clicks its tabs (Lot Details, Fee Ledger, Change Audit).

Voiceover: "On the Inventory Oversight tab, we have full view of all stored lots. Selecting a batch code pulls up its side panel drawer. Here, admins can inspect the specific grade, track daily storage fee accumulations, and audit every historical status change logged in the Convex timeline."

Time Cue: 01:12 - 01:19

Visual: Clicks 'Orders' tab, loading the Orders Ledger. Clicks Kevin Amisom's Cassava order to review fulfillment.

Voiceover: "The Orders tab displays the contract ledger. Clicking an order reveals its live fulfillment status, verifying details like locked stock reservations, payments, and dispatch routing."

Part 3: Finance, Directories & Operations Management

Video Source: *people oversight & warehouse config* | Duration: 50s

Time Cue: 01:20 - 01:23

Visual: Clicks Sales, Finance, and Dispatch tabs, showing 'No records found'.

Voiceover: "For financial and logistics auditing, the Sales, Finance, and Dispatch tables act as the source of truth, tracking payment settlements and cargo movements."

Time Cue: 01:24 - 01:42

Visual: Directory navigation: Farmers (Osei Andrews profile), Buyers (Catherine Bruce and Kevin Amisom profiles), Agents (Kevin Amisom assigned to 7 warehouses).

Voiceover: "Our directory tabs allow us to oversee all actors. We can review farmer registrations, manage buyer profiles, and track our warehouse agents, verifying their assigned community warehouses and permissions."

Time Cue: 01:43 - 01:52

Visual: Under Configuration, opens 'Access', navigating inner tabs: Invites, Admin Users, Groups, Permission Preview.

Voiceover: "Under Access Configuration, the system manages role-based access controls and invite logs, letting us issue and audit platform tokens."

Time Cue: 01:53 - 02:10

Visual: Clicks 'Warehouses' and selects 'Tarkwa Community Warehouse'. Inner tabs: Profile, Capacity, Agents, Schedule. On schedule tab, clicks orange 'Maintenance' button, warning popup triggers, clicks 'Cancel'.

Voiceover: "In the Warehouses directory, we oversee all physical storage assets. If a depot requires repairs, the admin can trigger a maintenance state. The platform warns us that changing this status impacts active intakes and listings, prompting a confirmation before committing the update."

Part 4: Governance & Reports

Video Source: *governance metrics & activity timelines* | Duration: 26s

Time Cue: 02:11 - 02:15

Visual: Clicks 'Fee Rules' and 'Disputes' under Governance.

Voiceover: "Governance modules handle our operational fee rules and dispute resolutions, ensuring all parties adhere to verified terms."

Time Cue: 02:16 - 02:20

Visual: Clicks 'Notifications' (automated logs) and 'Audit Logs' (actor timeline).

Voiceover: "The platform registers all transaction logs and audit logs. This creates a tamper-proof record of every system event, trace, and status update for absolute accountability."

Time Cue: 02:21 - 02:36

Visual: Clicks 'Reports', showcasing high-level summaries and capacities, then returns to OBS to stop recording.

Voiceover: "Finally, the Reports portal generates executive breakdowns of storage utilization and financials. This comprehensive view ensures that Kuapa Dwaso remains structured, audited, and optimized from end to end."
