

Kuapa Dwaso Buyer Voiceover Script

Timed to sync with screen recordings of the Buyer Portal

Part 1: Registration & Onboarding

Video Source: *registration walkthrough* | Duration: 1m 5s

Time Cue: 00:00 - 00:15

Visual: Clicks 'Join the Pilot' on the landing page, and selects 'Buy Produce' on the role selection screen.

Voiceover: "To join Kuapa Dwaso as a buyer, we click 'Join the pilot' and select our role. In this walk-through, we'll choose 'Buy produce' to set up our trader profile."

Time Cue: 00:15 - 00:30

Visual: Inputs phone number, receives the transactional SMS verification code, and verifies the account.

Voiceover: "Account security starts with phone verification. We input our phone number and verify it instantly with a one-time code. This ensures all buyer communications are securely tied to a real device."

Time Cue: 00:30 - 00:50

Visual: Fills profile details (Kevin Amisom, market trader, Tarkwa Market Circle destination market) and clicks 'Save profile'.

Voiceover: "We complete our profile by adding our name, business type, and target destination market—in this case, Tarkwa Market Circle. This destination helps the platform group bulk logistics and coordinate shipping later. With a click, the account is created and ready for verification."

Time Cue: 00:50 - 01:05

Visual: Navigates the buyer dashboard tabs (Marketplace, Orders, Profile).

Voiceover: "Once logged in, we land on our marketplace dashboard. Buyers have immediate access to real-time available stock, their purchase history, and profile controls directly from the bottom navigation bar."

Part 2: Marketplace Purchase & Real-Time Reservation

Video Source: *checkout flow & confirmation* | Duration: 1m 8s

Time Cue: 00:00 - 00:10

Visual: Marketplace dashboard scrolling and clicking 'Order Details' on the Cassava listing.

Voiceover: "On the marketplace dashboard, we see verified, available warehouse stock. Buyers can scroll through listings, filter by crop or grade, and click 'Order Details' to inspect any batch."

Time Cue: 00:10 - 00:17

Visual: Reviewing Stock Detail Summary and expanding 'How Fees & Transportation Work' panel.

Voiceover: "Here, we see the Stock Detail Summary. It shows total available tubers, pricing, freshness, and the dispatch schedule. Expanding the fee dropdown reveals a transparent breakdown of the purchase price, service fees, and transport costs."

Time Cue: 00:17 - 00:35

Visual: Checkout form. Inputs 100 tubers, changes price from 30 to 25, triggering the validation error.

Voiceover: "Next, we click 'Continue to Place Order' and set our quantity to 100 tubers. When we try to bid below the minimum price of 30, the system triggers a validation error. This protects the contract terms set during produce intake."

Time Cue: 00:35 - 00:55

Visual: Corrects price to 30, selects warehouse dispatch date dropdown, and clicks green 'Request Produce'.

Voiceover: "Reverting the price to 30 instantly clears the error. We select our warehouse dispatch date from the dropdown and click 'Request Produce' to submit our purchase request."

Time Cue: 00:55 - 01:08

Visual: Order tracking screen opens showing Order ID #M174MCR4, fulfillment journey timeline, invoice, and locked reservation status.

Voiceover: "Our order is submitted successfully. The platform assigns a unique Order ID and updates the fulfillment timeline in real-time. The system has automatically locked our 100 Cassava tubers in the warehouse, preventing double-selling. The invoice is generated, and we are ready to complete the payment."
