

Kuapa Dwaso Transporter Voiceover Script

Timed to sync with screen recordings of the Transporter Onboarding

Part 1: Registration & Onboarding

Video Source: *registration & route setup* | Duration: 1m 20s

Time Cue: 00:00 - 00:15

Visual: Clicks 'Join the Pilot' on the landing page, and selects 'Transport produce' as role on the signup screen.

Voiceover: "To sign up as a transporter on Kuapa Dwaso, we select the 'Transport produce' option under role selection. This links the user profile to our logistics network."

Time Cue: 00:15 - 00:30

Visual: Inputs phone number and verifies it with OTP '744951'.

Voiceover: "Just like buyers and farmers, we authenticate securely using a one-way SMS verification code. This ties the transporter's mobile number directly to their account."

Time Cue: 00:30 - 01:20

Visual: Completes profile details (Johnson Mesah, 20 ton Truck, Tarkwa) and inputs serviced routes and destinations.

Voiceover: "We enter our profile details—Johnson Mesah, driving a 20-ton truck out of Tarkwa. Specifying our vehicle capacity and exact service routes like Sefwi Wiawso or Bibiani is critical; this data is used by the platform to automatically match us with bulk shipments that fit our truck size and route locations."

Part 2: Login & Verification Pending State

Video Source: *dashboard access & verification warnings* | Duration: 51s

Time Cue: 01:20 - 02:00

Visual: Encounters profile warning, signs out, and logs back in via the Transporter Login portal with code '713436'.

Voiceover: "After onboarding, we log in specifically through the Transporter Login portal. Re-authenticating with a secure code loads the dashboard for our assigned vehicle profile."

Time Cue: 02:00 - 02:11

Visual: Accesses dashboard. Dashboard shows Johnson Mesah's truck details with a 'Pending' status and an admin approval banner.

Voiceover: "Our dashboard is active, but our status is marked as 'Pending.' In Kuapa Dwaso, transporters carry high-value produce batches, so accounts must be verified by an admin before they can see or accept dispatch jobs. This protects the security of the harvest."

Part 3: Uploading Truck Evidence & Navigation

Video Source: *truck evidence upload & menu navigation* | Duration: 32s

Time Cue: 02:11 - 02:20

Visual: Clicks 'Manage profile and truck evidence' and uploads 'produce truck.jpg'.

Voiceover: "To get verified, we click 'Manage profile and truck evidence' and upload a photo of our vehicle. This truck photo serves as visual proof of capacity and identity for our warehouse agents."

Time Cue: 00:11 - 00:20

Visual: Status shows 'Pending upload' and briefly flashes a network error.

Voiceover: "The system handles the upload state securely, tracking it as a pending asset in our database. Even if a brief network hiccup occurs on poor connections, the metadata is saved."

Time Cue: 00:20 - end

Visual: Photos counter updates to 1. Navigates the navigation bar tabs (Dispatches, Profile, Home).

Voiceover: "Our upload is recorded, and the truck photos counter updates to one. Browsing the 'Dispatches' tab shows it is currently empty. Once the admin reviews our truck evidence and verifies our account, matching dispatch requests will appear here, ready for transport."
